Abhay Jain

Renesas | McKinsey | Stanford GSB MBA / MS | IIT | Mitsubishi Heavy Industry | Nextera Inc
Bengaluru, Karnataka, India

Summary

Semiconductor business leader with global experience spanning product development, portfolio strategy, market development, and business operations across India, Japan, and the United States. Currently leading Renesas' India-for-India business for Power and Analog Semiconductors, focused on identifying growth opportunities, shaping localized product strategies, developing ecosystem partnerships, and accelerating market adoption across key industry segments. My career has combined engineering, consulting, and operating leadership experiences, enabling me to bridge technology, product, and business priorities. I have led initiatives ranging from product and portfolio strategy to organizational transformation, operating model design, and cross-functional execution across global organizations. Prior experience includes leadership roles at Renesas Electronics, McKinsey & Company, and Mitsubishi Heavy Industries. Areas of focus include semiconductors, energy, product strategy, business growth, market development, industrial technology, and deep-tech innovation. Stanford GSB MBA/MS and IIT Kanpur graduate.

Experience

Renesas Electronics

2 years 11 months

Business Division Leader

July 2025 - Present (1 year)

Bengaluru

Senior Director

Leading Renesas' India-for-India business focused on Power Semiconductor (PMIC, DCDC, BMS, MOSFET, GaN, etc.) and analog semiconductor (sensors, programmable mixed signal asics, video encoders, opamps, etc)

Q&A: Experts discuss the future of waste disposal

Global surveys of consumer sentiment during the coronavirus crisis

Stanford experts discuss challenges and opportunities in disposing of waste

Patents

EMERGENCY SHUT-OFF DEVICE

EMERGENCY SHUTOFF DEVICE AND EMERGENCY SHUTOFF SYSTEM

Responsible for driving localized product strategy, market development, ecosystem partnerships, and growth initiatives across India. Working closely with customers, product groups, engineering teams, and sales organizations to identify market opportunities, shape product roadmaps, and accelerate adoption across automotive, industrial, energy, consumer, and emerging technology segments.

Driving business expansion for a significant portion of Renesas' semiconductor portfolio, including power management, power discretes, sensing, mixed-signal, and embedded solutions.

Focused on building long-term organizational capabilities, strengthening customer engagement, and developing scalable business models to support sustainable growth within India's rapidly evolving electronics ecosystem.

Head of Strategy execution and process improvement

June 2024 - August 2025 (1 year 3 months)

San Francisco Bay Area

Director, Strategy, Execution and process improvement for Power Business Unit (~3 B business).

Created and led a team to enable, strategize and govern central program management, resource planning, outsourcing, design control, talent development, and analytics / automation, resulting in a 15-20% increase in operational efficiency

Orchestrated key presentations for SVP, Power Business, including investor updates and board sessions, effectively communicating achievements, strategic goals and priorities, and near term actions

Worked on strategy & operation projects such as revamping of new product development process, creation of product line manager playbook, and defining R&D site plans drive efficiency, scale and transparency

Engaged on strategy & operations projects such as revamping new product development processes, developing product line manager playbook, and R&D site planning to drive effective leadership, coherent scaling, & metric drive growth

Chief of Staff to Chief Product Officer (Power)

April 2024 - June 2024 (3 months)

San Francisco Bay Area

Chief of Staff to SVP power Business, a \$3B business poised for high growth with advancement in AI, and EV among others.

Chief of Staff To Chief Sales and Marketing Officer

August 2023 - April 2024 (9 months)

San Francisco Bay Area

Chief of Staff to Chief of Marketing Officer for a \$30B semiconductor company
Led a senior leadership team to define and execute the GTM strategy, including creating a comprehensive sales playbook and KPI based dashboards, resulting in improved sales performance metrics and unified sales approach

McKinsey & Company

3 years 8 months

Engagement Manager

November 2021 - August 2023 (1 year 10 months)

San Francisco Bay Area

Led operational excellence at a leading rooftop solar provider to reduce cost and improve project execution and customer satisfaction

Spearheaded growth strategy, long term sales planning, and sales channel coverage optimization strategy and execution for a tech infra/cloud provide

Led commercialization efforts including the launch of a new commercial real estate SaaS product for a fintech company

Defined GTM coverage model (including channel and customer success) and territory mapping for industrial SaaS provider

Officially designated in April 2022

Senior Associate

February 2021 - October 2021 (9 months)

San Francisco Bay Area

Collaborated with CCO & CTO of a consumer electronics company to do org re-design, ~10% top line growth, and ~9% cost savings in a post-merger integration; Formulated brand-led product development strategy & process

Led strategic efforts to reduce sales churn for an Ag-chemical company; helped improve sales operations based on a customer journey value management effort

Associate

January 2020 - January 2021 (1 year 1 month)

San Francisco Bay Area

- # Executed commercial/growth transformation pilots for sales team/dealer capability building, and aftermarket performance enhancement for commercial vehicle OEM
- # Formulated organic & inorganic growth strategy for 2X rev. aspiration for one of the largest med-tech company
- # Co-led ~40 worldwide teams to conduct & publish consumer sentiment index survey reports that witnessed 1M+ views
- # Advised & implemented re-org efforts & defined post-COVID digital strategy for one of the largest apparel companies

SPARKZ Inc.,

Business Development and Product Development Manager

April 2019 - September 2019 (6 months)

San Francisco Bay Area

Drafted venture finance model and pitch deck for strategic investment.

Assisted in creating a proposal for government grants received together with Oakridge National Lab.

Collaborated with CEO to establish sales and manufacturing contracts with some of the fortune fifty companies.

Duties:

Contacting potential clients to establish rapport and arrange meetings.

Researching organizations and individuals to find new opportunities. Attending conferences, meetings, and industry events. Developing quotes and proposals for clients. Developing goals for the development team and business growth.

Determines product pricing by utilizing market research data; reviewing production and sales costs; anticipating volume. Establishing time schedules with engineering and manufacturing.

Sparkz is a Silicon Valley-based innovative battery system startup that offers fast charging, wider operating temperature range, and long life battery solutions at a low cost.

NextEra Energy Resources

MBA Intern, Renewable Energy Innovation and Strategy Team

June 2019 - August 2019 (3 months)

Jun Beach, Florida Area

Presided entitlement (six sigma) project to evaluate net earnings improvement opportunities for the wind energy business. This was done by conducting big

data analytics using supervised and unsupervised machine learning to identify cost-driving attributes. Python on AWS sagemaker was used for this purpose.

Averda

Operations Intern, COO Office

August 2018 - September 2018 (2 months)

Dubai, United Arab Emirates

Developed market expansion strategy for ASEAN market by conducting gap analysis for policy and waste type

Averda is an integrated waste management company doing everything from collection to disposal and street sweeping. It deals with all types of wastes as well.

AutoGrid

Summer Associate (Solutions and Data Science)

June 2018 - August 2018 (3 months)

Redwood City, CA, USA

Analyzed pan USA energy market for behind the meter storage in grid service applications. Created behind-the-meter battery management software's development and sales strategy across the USA. Developed simulation (Using python) for battery optimization software usage at scale and created an excel tool to determine battery costs.

AutoGrid is a software solution provider for energy companies. Their suite of Energy Internet applications allows utilities, electricity retailers, renewable energy project developers, and energy service providers to deliver clean, affordable and reliable energy in a distributed energy world.

Atul's Prestige Smart Kitchen

Partner

August 2015 - September 2017 (2 years 2 months)

Roorkee, India

Co-invested to buy the commercial property and franchise of Prestige smart kitchen. Overlooking overall showroom layout. Managing technical logistics including electronic equipment such as showroom CCTV security, billing system and related auxiliaries. Remotely monitoring the operations.

Prestige Smart Kitchen, a division of TTK Prestige Ltd. is an exclusive retailer for prestige products. Our showroom (Atul's), a prestige smart kitchen outlet offers a complete range of domestic and commercial cookware.

Mitsubishi Heavy Industries Compressor Corporation

3 years 9 months

Marketing and Sales executive, Global Marketing and Sales

April 2016 - June 2017 (1 year 3 months)

Tokyo, Japan

Co-managed, execute and deliver new product lines and business initiatives in LNG (liquefied natural gas) and FPSO (floating production storage and offloading) markets. Lead engineering teams to create proposals. Developed and implemented sales plans. Lead corporate negotiations. Managed client and vendor relationships in over 10 countries. Coordinated and create sub-vendor requisitions.

Led marketing & sales for new products in Liquefied Natural Gas and floating oil production market to qualify the company. Administered and created bidding proposals, cost estimates and sales strategies for worldwide oil and gas industry, and North-South American petrochemical industry.

Initiated establishment of information-sharing procedures for new business units in the US and Brazil office for better coordination

Develop and improve upon existing marketing strategies by consulting market research to assess current trends and brand awareness. Networked with suppliers, partner organizations, large contractors and other professionals. Helped produce reports, and related marketing materials and literature. Liaisoned with internal and external teams

compressor engineer

October 2015 - March 2016 (6 months)

Hiroshima, Japan

Developed a training program for new engineers, reducing on-job training time from 12 to 3 months

Co-published research for and was the youngest presenter at the first Asian Turbomachinery and Pump Symposium, Singapore, Feb 2016

Performed design engineering and analysis for a compressor. Coordinated with inter-departmental personnel, project managers & clients to review designs and resolve concerns. Performed special studies involving the review, research, calculations. Ensure the work always matching with the schedule. Ensure the work is according to company and customer specifications for the compressor. Ensure the instruction design meets the appropriate levels of quality and robustness and confirms that defined requirements are met. Plan and coordinate the Design Iteration activities with the different teams. Complete relevant paperwork in detail, ensuring the paperwork is clear, accurate and legible. Kept the customer informed and ensure all work completed is done with their approval. Essentially did a lot of project management for a technical product.

steam turbine Engineer

October 2013 - October 2015 (2 years 1 month)

Hiroshima, Japan

First foreign recruit from university for Mitsubishi Heavy Industries

Led team of engineers to prototype and patent new steam turbine safety device manufacturing and verification with a budget of \$50K; prepared and delivered marketing presentation to potential customers

Designed and upgraded software-based automation solutions, reducing total engineering time by 450 hours per year

Initiated Project "Mitsubishi Global" with executive leaders to address cultural roadblocks in the working environment

A pioneer member of campus recruit from Foreign country for Mitsubishi. Only one selected out of 50 to attend Mitsubishi pre-recruitment sessions at IIT Kanpur (3 years)

Performed design engineering and analysis for a steam turbine. Coordinated with inter-departmental personnel, project managers & clients to review designs and resolve concerns. Performed special studies involving the review, research, calculations. Ensure the work always matching with the schedule. Ensure the work is according to company and customer specifications for the steam turbine. Ensure the instruction design meets the appropriate levels of quality and robustness and confirms that defined requirements are met. Plan and coordinate the Design Iteration activities with the different

teams. Complete relevant paperwork in detail, ensuring the paperwork is clear, accurate and legible. Kept the customer informed and ensure all work completed is done with their approval. Essentially did a lot of project management for a technical product.

Transocean

Trainee

May 2012 - July 2012 (3 months)

Formulated strategy for effective hull management for offshore oil drilling vessels by conducting cost Analysis for various coating/Steel maintenance strategies. Worked on corrosion management & recommended coating systems for the protection of tanks in oil rigs. I also developed software using Visual Basic. Net for standardization of steel and coating inspection reports

Aided Division Manager, Marketing in the creation of deficiency costing for Rig Magallen and Constellation II. Analyzed the specifications of the above-mentioned rigs for contractual requirements of ONGC

Assisted in defining work scope for UWILD (Under Water Inspection in Lieu of Dry Docking) for rig MG Hulmes Jr.

Education

Stanford University Graduate School of Business

Master of Business Administration - MBA, Business Administration and Management, General · (2017 - 2019)

Stanford University

Master of Science - MS, Energy, Environment, and Natural Resources Law · (2017 - 2019)

Indian Institute of Technology, Kanpur

Bachelor of Technology (B.Tech.), Materials and Metallurgical Engineering · (2009 - 2013)

DPS Vasant Kunj, Delhi

12th, PCM (Physics Chemistry and Math) · (2007 - 2009)

Montfort Sr. Sec. School, Roorkee

10th, physics chemistry maths · (1994 - 2007)
